PROFESSIONAL SUMMARY

Motivated Cyber Forensics graduate seeking an entry-level SOC Analyst role. Possesses a basic understanding of networking, log analysis, email security, and cybersecurity fundamentals through academic learning and internships. Eager to learn, adapt, and contribute to security monitoring and incident response activities.

TECHNICAL SKILLS

- Networking Tools: Wireshark, Nmap (Basic)
- Linux Troubleshooting (Basic)
- Networking Fundamentals
- Command Prompt (Basic)
- Cybersecurity Fundamentals
- Incident Response (Basic)
- Log Analysis and Monitoring (Basic)

INTERNSHIP

JOBIN & JISMI IT Services | May 2026 – June 2026

- Developed a basic understanding of networking, email security policies, and organizational security practices under the guidance of the IT Head.
- Learned the fundamentals of password management using Zoho Vault and endpoint security concepts using Sophos Endpoint Security.

Cyber Police Station | 2025

- Developed a basic understanding of cybercrime investigation procedures, digital forensics, and cybercrime reporting.
- Learned about common cyber threats, investigation workflows, and the cybersecurity tools used during cybercrime investigations.

PROJECTS

AI Log Analyzer Tool (Cybersecurity Project) | 2025

- Designed an AI-assisted log analysis concept for SOC-style security monitoring.
- Studied log formats and identified suspicious activity patterns within system logs.

World History Educational Website | 2026

- Developed a bilingual educational website using Python, HTML, and CSS.
- Organized structured educational content with user-friendly navigation.

EDUCATION

- Bachelor of Science (BSc) in
Cyber Forensics Mahatma
Gandhi University, May
2026

SOFTSKILLS

Communication, Problem Solving, Team Collaboration, Attention to Detail
